Since XM has added traffic and weather to their programming line-up I have no reason to switch to local programming. The local programming for traffic is so bad, inaccurate, and untimely that the reports are completely useless. I use the XM traffic channel everyday, and driving over 100 miles a day makes it worth my 9.95/MO alone. Please do not allow the NAB to shut down one of XM's most valuable services.  
Thanks  
Mike
